

Mersen

THERMAL OXIDISER

Technology for a Sustainable Future

ERG

Air Pollution Control

Client:

Mersen

Site:

Lanarkshire, Scotland

Application:

Graphite insulation materials
manufacturing: furnace off-gas thermal
destruction of VOCs

Equipment:

- High temp, gas-tight process gas ductwork and control valves
- Thermal oxidiser with multi-stream inlet gas manifold
- Natural gas fuelled burner package
- Fans and discharge stack
- Control panel and system

Year delivered:

2020
